

Post Bottling Work and Additional Labels

We currently offer additional services once bottling has occurred:

- **VinPro Stickers:** We do it all for you.
- **Client Off-Site Stickers:** We load out the wine and it is taken off site to do the work.
- **Client On-Site Stickers:** You come to VinPro and perform the work yourself with your own team.

Due to increased Health and Safety Legislation, the need to plan when and where to do this work, and the need to ensure wine is adequately labelled, we need to implement some procedures to the onsite services we offer.

Our priority is to ensure there is a safe environment for you and your personnel to work in. We are now required by law to induct all visitors onto our premises prior to any work commencing. We ask, therefore, that as much notice as possible, is given when wishing to come on site so that we can ensure inductions occur prior to the work starting.

All onsite work must be booked via our Production Planner, using a labelling spec sheet. There will be a charge to cover the costs involved in the whole process. This includes, induction, getting the wine out, rewrapping, labelling and putting it away.

Please see the resource centre on our website for the labelling spec sheet, www.vinpro.co.nz.

Should you have any queries, please do not hesitate to contact us.
